

## Star Wheel Assembly Instructions

1. Print all the pages in the pdf
2. Cut out all the pieces following the solid black lines
3. Lay the covers on a flat surface right sides down matching bottom edges.
4. Tape full length of bottom edges together.
5. Fold wrong sides together.
6. Tape left and right sides together.
7. Tape top left and top right edges together making sure to leave room for the disc to fit.
8. Insert the star chart into the finished cover.

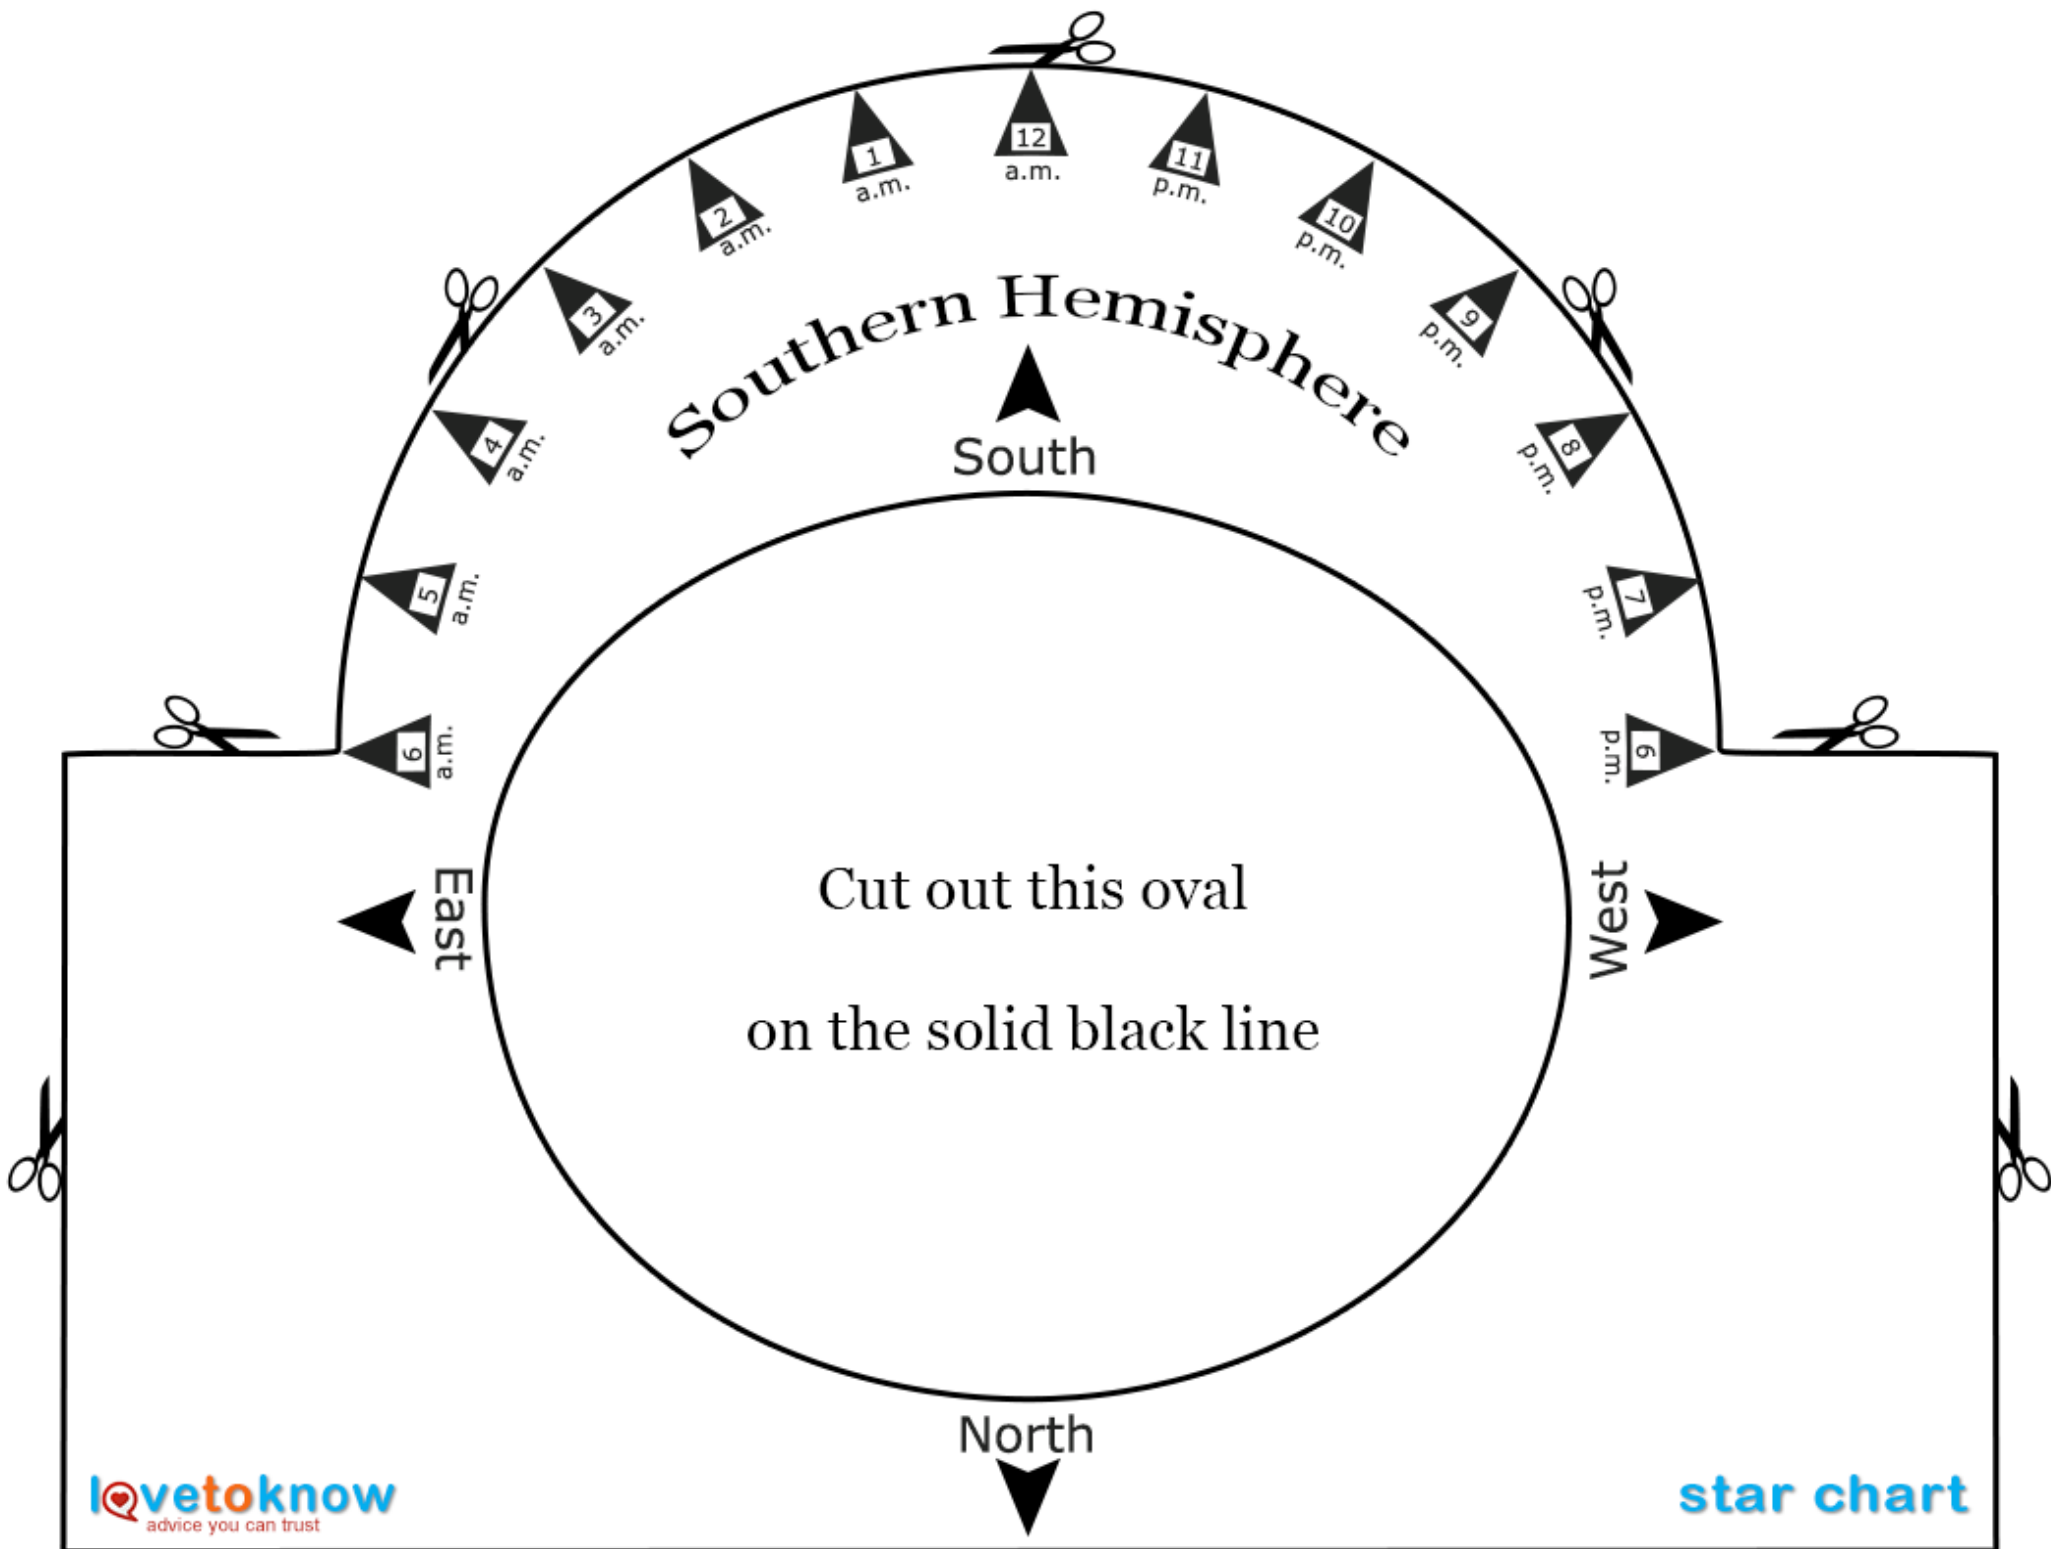

## How to use the Star Wheel

1. Set the date and time by matching the date on your star wheel with the time on the star wheel holder.
2. Figure out what direction you are facing. Make sure you are facing a cardinal direction like north, east, south or west as opposed to northwest or southeast.
3. Hold the wheel above your head so that the arrow of the direction you are facing is pointing that direction as well. For example, if you are facing south, make sure that as you're holding the wheel above your head, the south arrow is pointing towards the south (or away from you.)
