

# How to Drive

## Getting Started

### Step 1

Take a moment to sit down in the driver's seat, and get familiar with the car. With the car off, adjust the seat so you can comfortably reach the gas pedal and the brake pedal. The brake is on the left, and the gas is on the right.

### Step 2

Insert the key into the ignition. Press the brake pedal all the way down to the floor while you turn the key away from you to start the car. Notice that the transmission is in "Park."

### Step 3

Shift the transmission into "Drive." The car will begin to roll forward.

### Step 4

To go faster, step on the gas pedal. The car's speed will increase.

## Going Backward

### Step 1

To go backward from a stop, start by putting your foot on the brake and ensuring the ignition is turned on.

## Step 2

Shift the transmission into "Reverse." The car will begin to roll backward slowly.

## Step 3

To go faster in reverse, gently step on the gas pedal.

## Slowing Down and Stopping

### Step 1

To slow down, remove your foot from the gas pedal. Gently place your foot on the brake.

### Step 2

To stop completely, continue pressing the brake pedal until it is depressed all the way. The car will come to a stop.

### Step 3

Image = Park gear symbol (maybe a P in a box)  
Text = If you are ready to park the car, shift the transmission into park. Turn the key to turn off the car.
