

Child's No-Sew Fleece Hat

Things You'll Need

- Half a yard of fleece fabric
- Sharp scissors
- Ruler or tape measure

What to Do

1. Enlarge the pattern by three and print it out.
2. Cut out the fleece pieces using the pattern.
3. Set the small strip aside. This will be the tie that secures the pom-pom at the top of the hat.
4. Fold the larger rectangle in half so the two short sides line up.
5. Use your scissors to make 1.5-inch cuts every one inch up the short sides of the rectangle, cutting through both layers of fabric at the same time. This will create a fringe
6. Starting at the bottom, tie both corresponding fringe pieces together. Move up to the next fringe pieces and tie those together. Keep going until you've moved up the entire hat.
7. Fold the bottom edge up by about one inch.
8. Try the hat on the child. Gather the top together with your hand and tie it using the small strip of fleece you set aside.
9. Remove the hat and cut a fringe in the top area you gathered together. This will create a pom-pom on the top of the hat.

Pattern on next page.
