

How to Make a Paper Dollhouse Bed

Instructions

1. Print this document.
2. Cut out the shapes on the last pages of this document. There is a girl and a boy bed.
3. Follow the instructions below for folding.

The bed is made using the same basic technique as the doll's nightstand. However, instead of folding both the top and bottom flaps of the box, you're going to complete only the bottom flap. On the top flap that has a wood grain pattern, make two cuts and fold the flaps created by these cuts into the middle. Secure with clear tape. Fold the point of the top triangle down and glue it in place.

Flip your model over. Push the rectangle portion upward to create a headboard for your dollhouse bed.
