

How to Make a Paper Dollhouse Chair

Instructions

1. Print this document.
2. Cut out the shapes on the last two pages of this document.
3. Follow the instructions below for folding.

Complete the instructions for the paper nightstand project. This will be the base of your doll's chair.

Cut out the rectangle paper. Fold it in half and glue it closed. Place your masu box in front of you with the open part of the box face down. Tape or glue the folded rectangle to the back of one side of the box to make a finished chair.
