

How to Make a Paper Dollhouse Desk

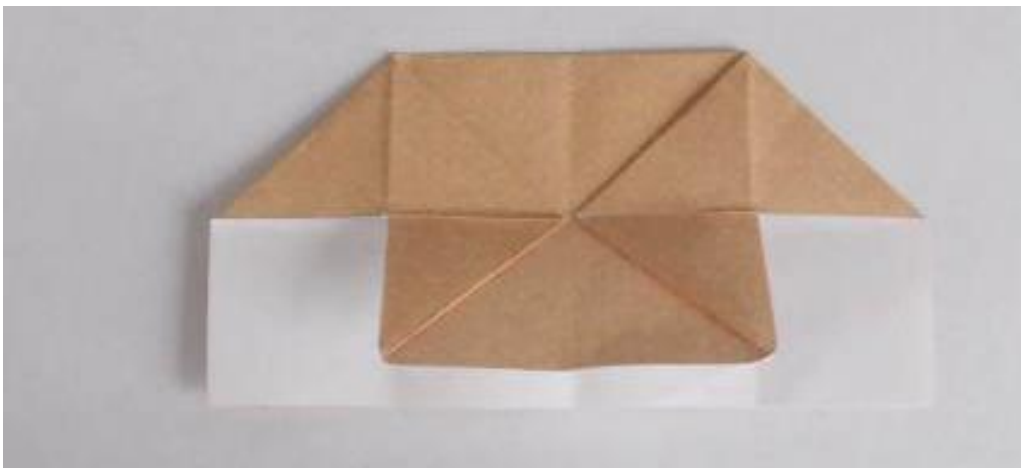

Instructions

1. Print this document.
2. Cut out the shape on the last page of this document.
3. Follow the instructions below for folding.

Fold your paper in half horizontally. Fold this rectangle in half once more. Unfold this previous fold, then fold the left and right sides in to meet the middle crease. Open the pockets on the left and right folds and push them flat with your finger. In origami, this form is called an organ base. The organ base can also be used to create a two-room [paper dollhouse](#).

Fold the middle flaps up to make two triangles as shown in the photo below. Bring the entire rectangular center portion upward, creasing well.

Fold the left and right sides in once more. Bring the top portion of the paper down to create the writing surface for your desk. Add a bit of clear tape beneath the writing surface to keep the sides of the desk stable. Make a chair for your doll to sit on, if needed.
