

# Locker Magnets

Decorative magnets can help hold things such as notes, photos and homework assignments in school lockers. You can make almost anything into a magnet with a purchased small round magnet or magnetic strip and a hot glue gun, or you can buy magnets that have sticky material on one side so you can just peel and stick. Use decorative card stock, photos, marbles or small toys to create magnets.

## Supplies

- Magnetic strip or circles
- Glue gun or tacky glue
- Decorative items such as buttons, photos, shells, or other trinkets

## Instructions

1. Glue a magnet to the back of a decorative object
2. Allow it to dry
3. Create several magnets for a themed look

These magnets also make a good gift for kids to give their peers.
