

## Digging into 3s, 4s

Dig into the following fact families with 3s and 4s. Each triangle of numbers has three number combinations that can be added and subtracted with 2 numbers in the problem and one for the answer. The first one has been completed for you.

$$\begin{aligned}4 + 3 &= \\3 + 4 &= 7 \\7 - 3 &= 4 \\7 - 4 &= 3\end{aligned}$$

$$\begin{aligned}3 + 2 &= \_\_\_ \\2 + 3 &= \_\_\_ \\5 - 2 &= \_\_\_ \\5 - 3 &= \_\_\_\end{aligned}$$

$$\begin{aligned}4 + 6 &= \_\_\_ \\6 + 4 &= \_\_\_ \\10 - 6 &= \_\_\_ \\10 - 4 &= \_\_\_\end{aligned}$$

$$\begin{aligned}3 + 3 &= \_\_\_ \\6 - 3 &= \_\_\_\end{aligned}$$

$$\begin{aligned}7 + 4 &= \_\_\_ \\4 + 7 &= \_\_\_ \\11 - 7 &= \_\_\_ \\11 - 4 &= \_\_\_\end{aligned}$$

$$\begin{aligned}4 + 2 &= \_\_\_ \\2 + 4 &= \_\_\_ \\6 - 2 &= \_\_\_ \\6 - 4 &= \_\_\_\end{aligned}$$

Answer Key:

$$\begin{aligned}4 + 3 &= 7 \\3 + 4 &= 7 \\7 - 3 &= 4 \\7 - 4 &= 3\end{aligned}$$

$$\begin{aligned}3 + 2 &= 5 \\2 + 3 &= 5 \\5 - 2 &= 3 \\5 - 3 &= 2\end{aligned}$$

$$\begin{aligned}4 + 6 &= 10 \\6 + 4 &= 10 \\10 - 6 &= 4 \\10 - 4 &= 6\end{aligned}$$

$$\begin{aligned}3 + 3 &= 6 \\6 - 3 &= 3\end{aligned}$$

$$\begin{aligned}7 + 4 &= 11 \\4 + 7 &= 11 \\11 - 7 &= 4 \\11 - 4 &= 7\end{aligned}$$

$$\begin{aligned}4 + 2 &= 6 \\2 + 4 &= 6 \\6 - 2 &= 4 \\6 - 4 &= 2\end{aligned}$$
