

Three-Toed Sloth

From
Central
& South
America

Three
long
claws

Live in
trees

Four-part
stomach

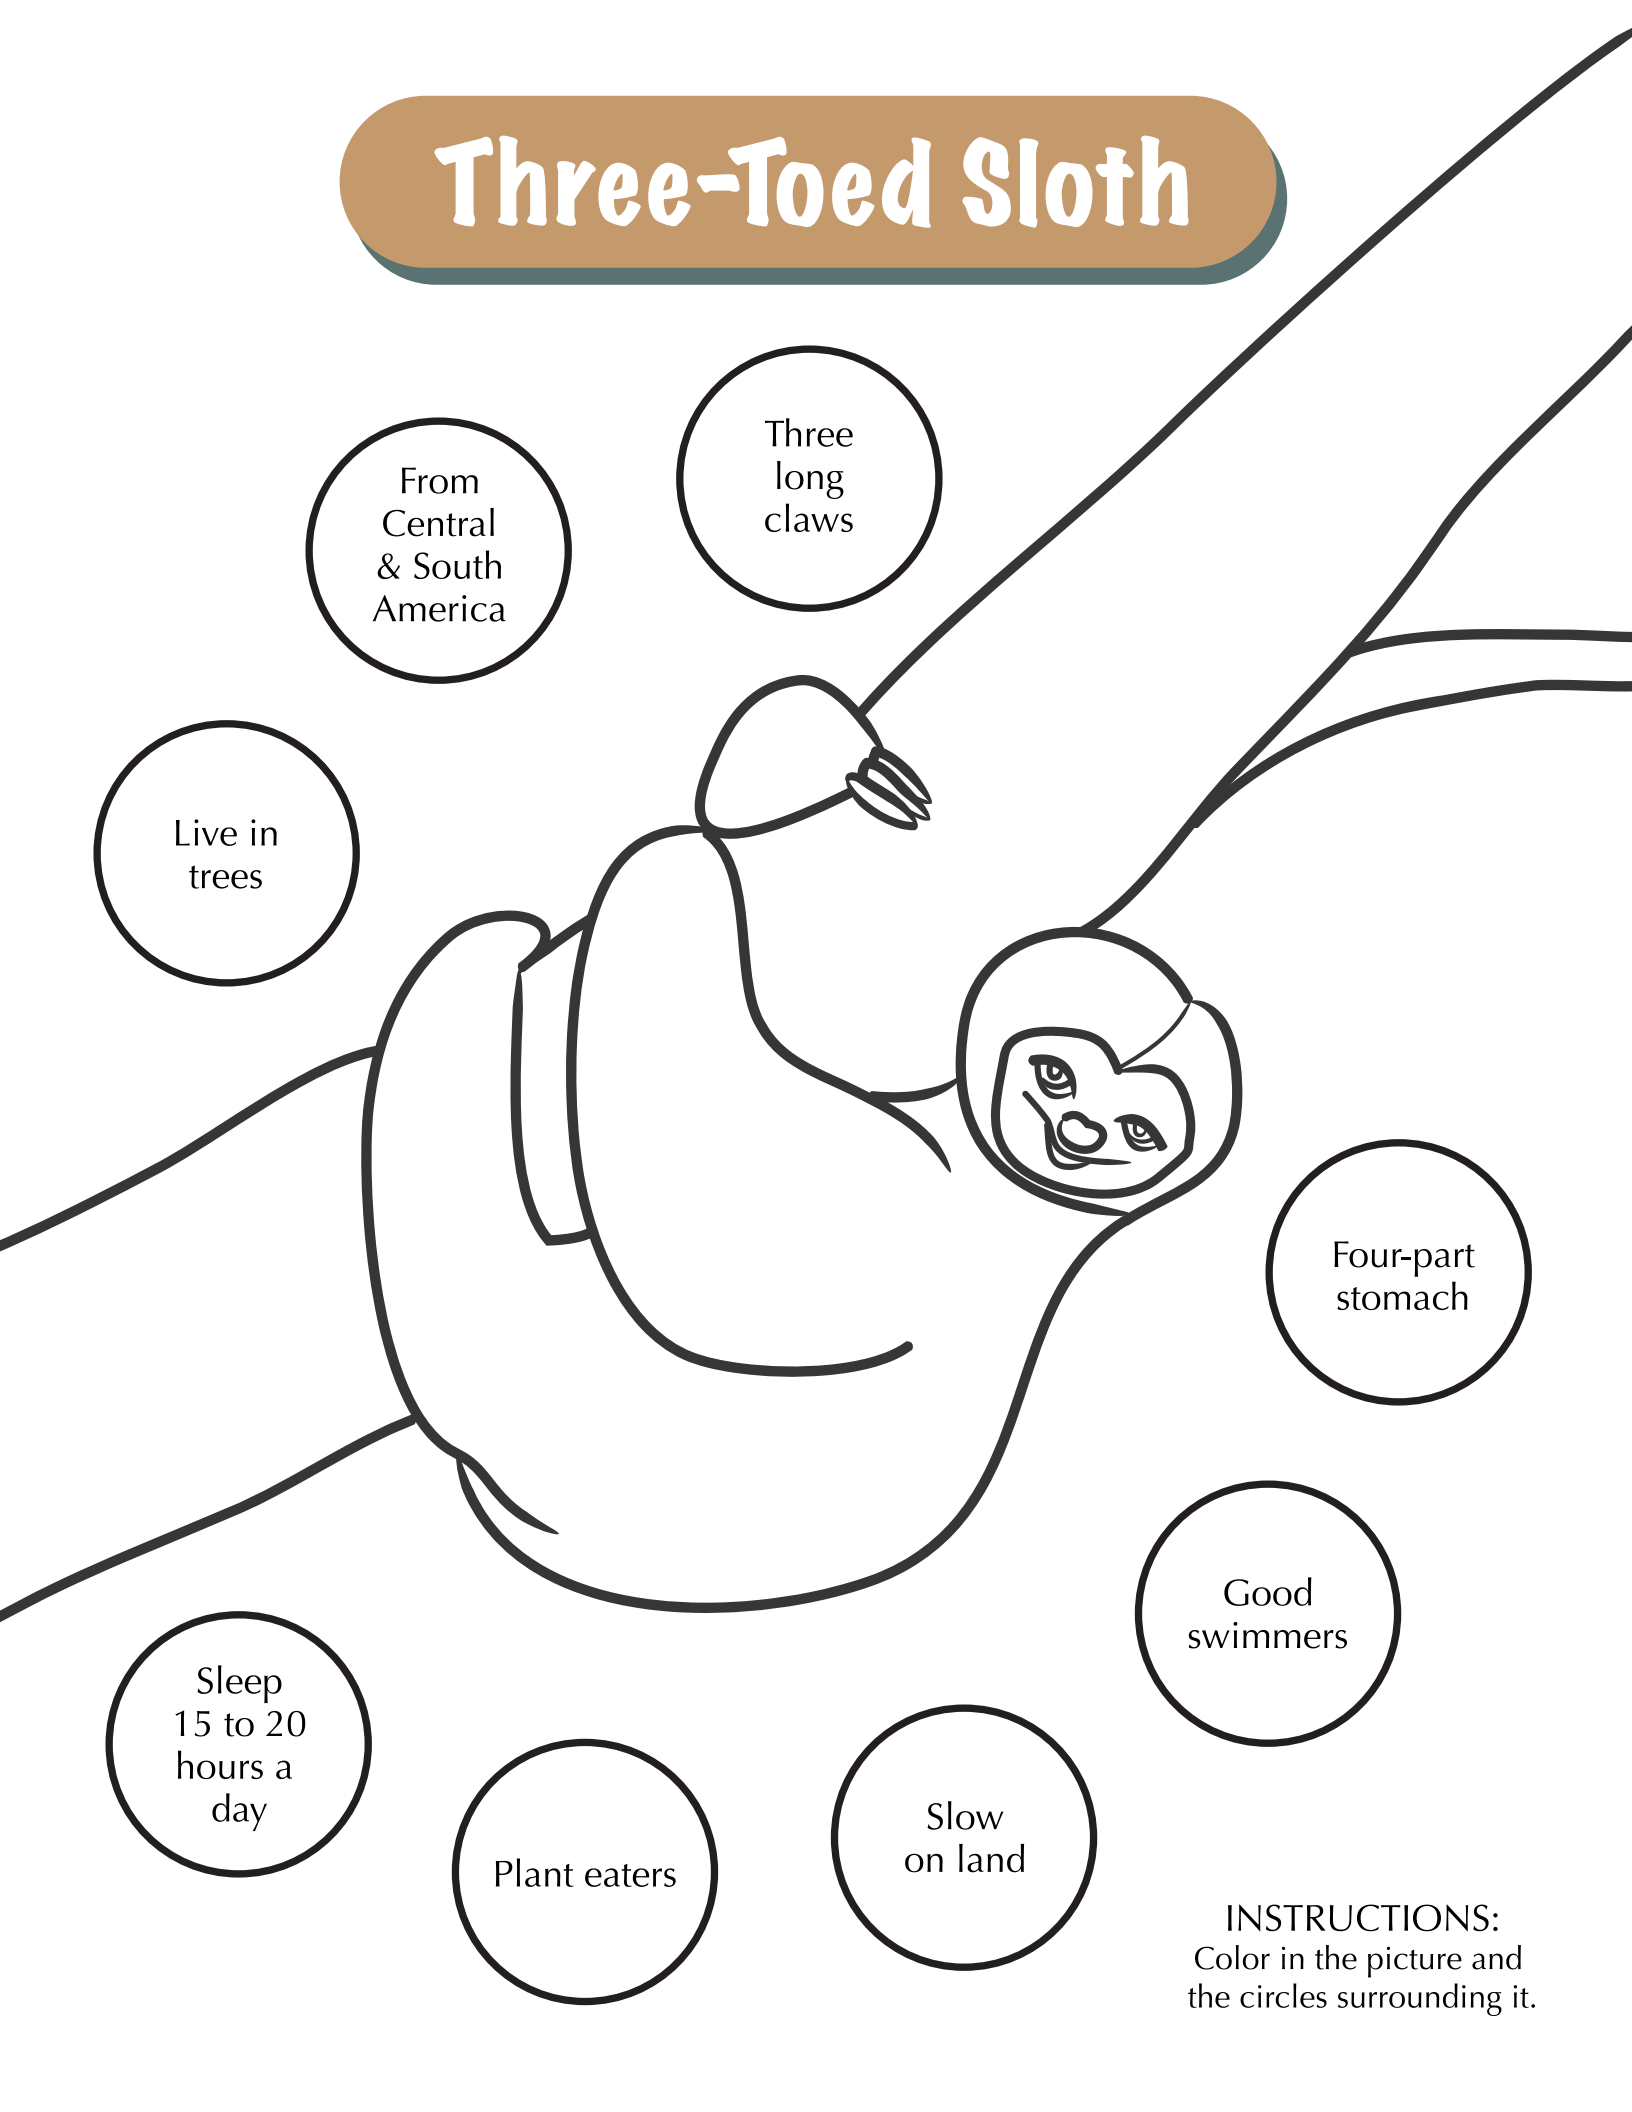

Good
swimmers

Sleep
15 to 20
hours a
day

Plant eaters

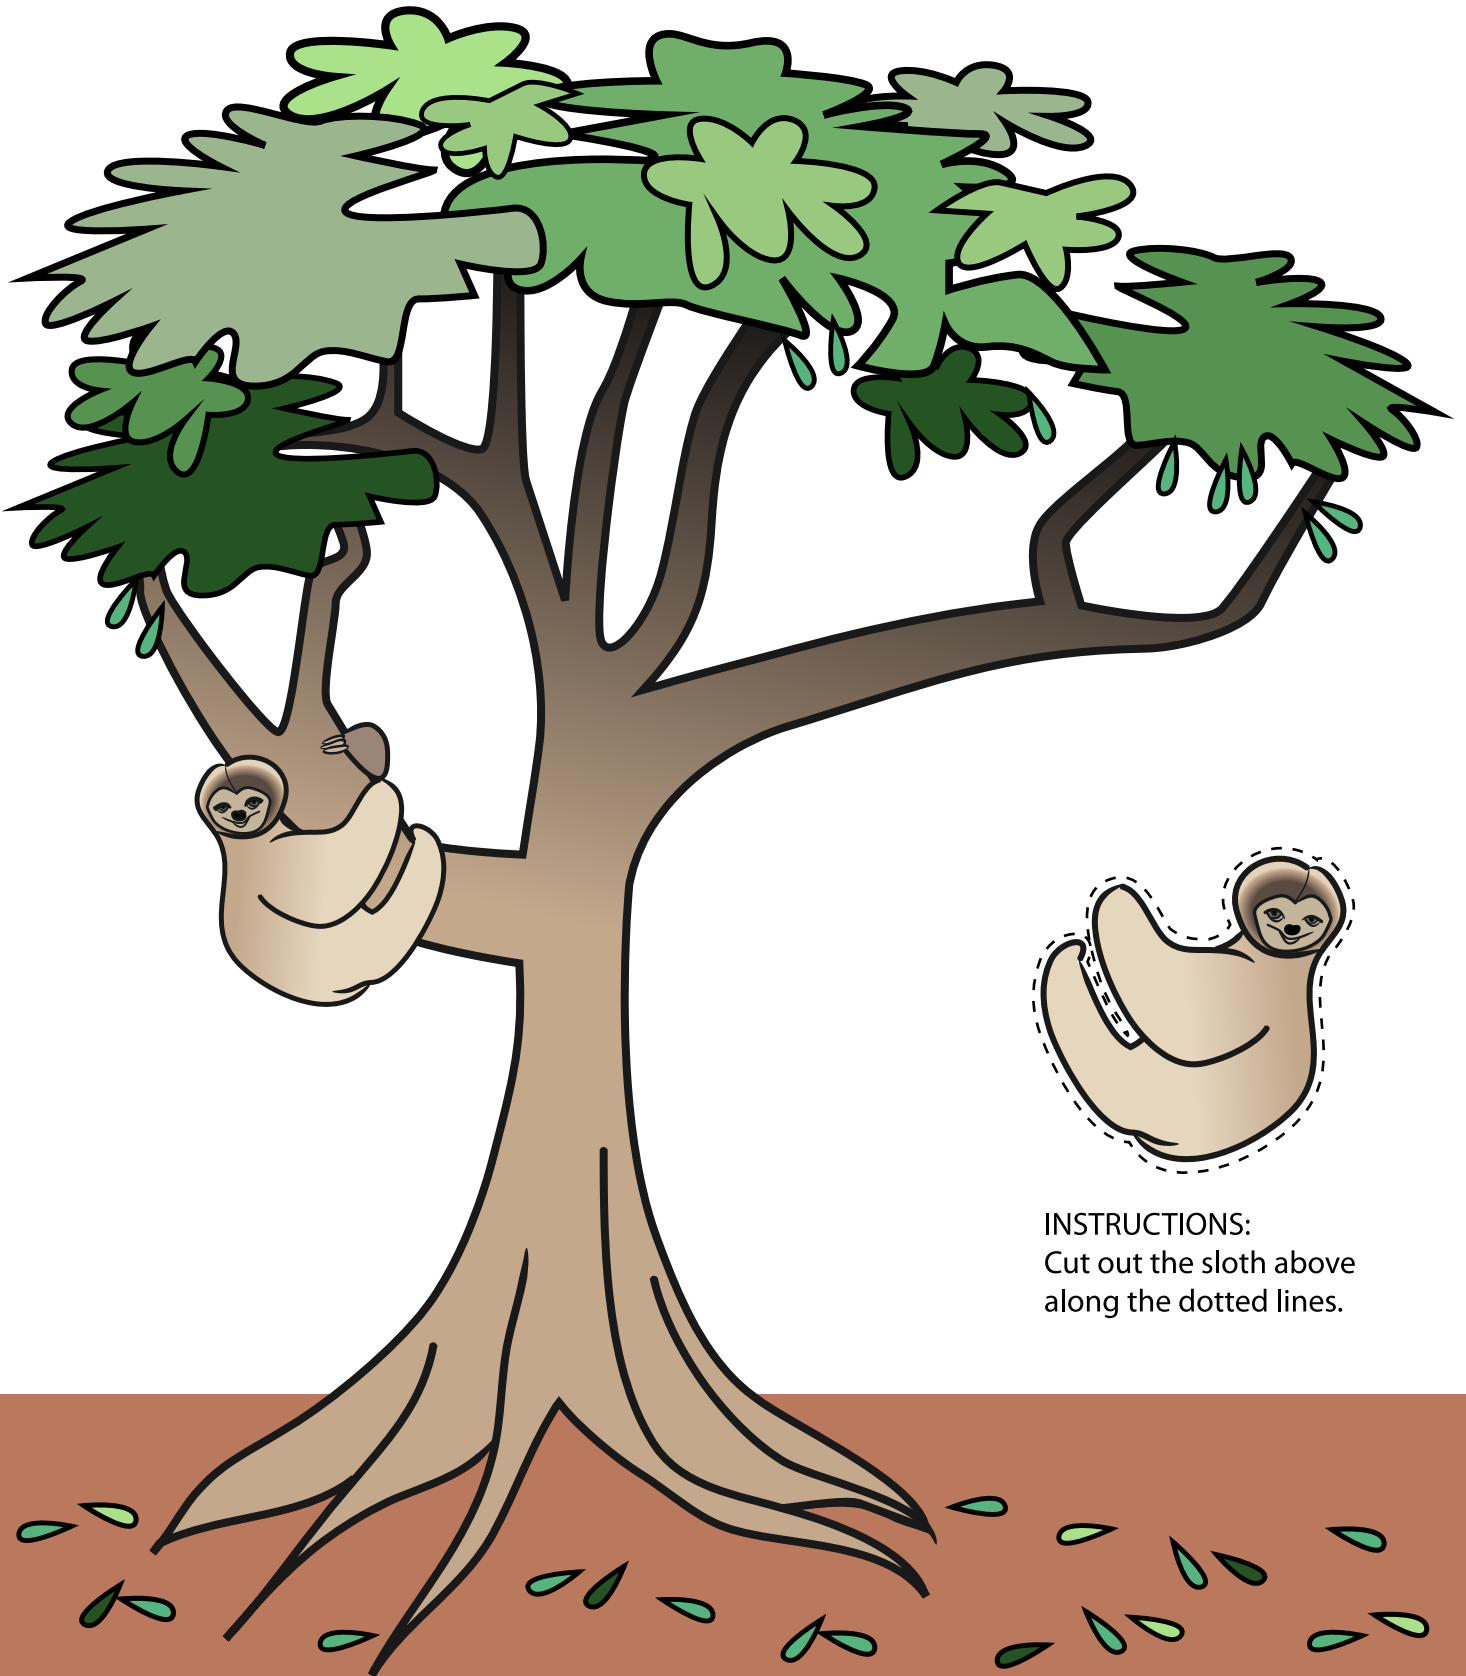

Slow
on land

INSTRUCTIONS:
Color in the picture and
the circles surrounding it.

ACTIVITY

Since sloths spend the majority of their time in trees, only coming down once a week (or sometimes even longer between) at night to use the bathroom, move the sloth below through the tree branches, helping him find food, a mate and a place to sleep.

INSTRUCTIONS:
Cut out the sloth above
along the dotted lines.
