Elementary Science Lab

What is your big question?

________________________________________________________________________

________________________________________________________________________

How are you going to answer this question?

________________________________________________________________________

________________________________________________________________________

What do you think will happen?

________________________________________________________________________

________________________________________________________________________

Data Options
Observation over time:
Use this for something that needs to be observed regularly over time.

<table>
<thead>
<tr>
<th>Control</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>
Multiple trials:
Use this for something that you can observe the results immediately, but has multiple trials.

<table>
<thead>
<tr>
<th></th>
<th>Trial 1</th>
<th>Trial 2</th>
<th>Trial 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>control</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>control experiment 1</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>experiment 2</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Conclusion:
Based on your data, what was your conclusion?

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

Did your data support your hypothesis?
