

Scary Witch Makeup

This witch is typically portrayed as being green, but the same basic principles can be applied to create a spooky witch with any color skin tone. Individuals with sensitive skin should note that novelty makeup can be irritating to the skin, so proceed with caution. Perform a patch test at least 48 hours prior to the day you plan to use the makeup.

Materials

- Green base makeup
- Light brown base makeup
- Facial sponge
- Dark red lipstick
- Black eye pencil
- Black mascara
- Purple face paint

Instructions

1. Soak a facial sponge in the green base makeup. Dab the makeup gently onto your face, concentrating it along your cheekbones, brown bone and chin.
2. Soak a facial sponge in a light brown makeup and gently dab it on over the green to add some dimension to the paint. This will leave you with a slightly mottled look.
3. Create some deep wrinkles in your face with the black eye pencil. Draw a line extending down and outward from the inner corner of each eye. Create a branch off each line to make an upside down "Y" on each cheekbone.
4. Apply some heavy black eyeliner to your upper and lower lids, extending the upper line out past the edge of the eyelid by approximately 1/2 inch. Follow with black mascara to darken your eyes.
5. Darken your eyebrows by drawing a thick black line over each one with the eyeliner. Draw some small lines extending upward from the top of the eyebrows to give the impression of heavy, hairy brows.
6. Using purple face paint, draw some lines bracketing either side of the mouth from nose to chin.
7. Apply a coat of dark red lipstick.
8. Outline your lips in black, and draw some black "wrinkles" around the lips with small lines radiating outward.
9. Finish by giving yourself a few black "moles" on your chin and nose.
