

Blinged Candlestick Holders

Add a little sparkle to some candlestick holders, or votive candle holders and scatter them around the room or on top of the dinner table. When the candles inside are lit, the flames will reflect off the glass pebbles, making them sparkle.

Materials

- Tall candlestick holders, or small glass votive candle holders
- Glue gun
- Hot glue sticks
- Clear glass "pebbles" or marbles

Instructions

1. Make sure the outside of each of the holders is clean and dry.
2. Glue the glass pebbles to the exterior of the holders in rows so that they are covered completely.
3. Clean away any stray glue strings and place a candle in each one.
