A-Line Skirt Pattern

Waistline = Hip measurement \(\div 2 + 1\)"

Sitting Hip Measurement \(\div 2 + 1\)"

A-Line Skirt
Front and Back
Cut 2

Hemline = Hip Measurement \(\div 2 + 6\)"

**Belt Loops** - Cut five 1 1/2" by 2 1/2"

**Belt** - Cut one 3" by (waist measurement + 14") Piecing is fine.

- This pattern has an elastic waistband. The waistline measurement of the skirt uses the hip measurement to ensure the skirt will fit over the hips when complete.
- The hip measurement is the fullest measurement around the hip area.
- The sitting hip measurement is the same area as the hip measurement, but is taken in a sitting position.
- This skirt falls 19 inches below the waist, or to mid-thigh. If a longer skirt is desired, extend the pattern from the hem, including the flare at the sides.
